DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

I. Group I, claim(s) 1-18, drawn to a system of transfer printing classified in class 101, subclass 117.

II. Group II, claim(s) 1-12 and 19-24, drawn to a system of transfer printing classified in class 101, subclass 33.

2. The inventions are distinct from each other because:

The claims of these two groups are directed to different inventions which are not linked to form a single general concept. The claims in the different groups do not have in common the same or corresponding "special technical features." In particular, the structural arrangement of the system of transfer printing where the transfer means comprises a heating plane operated by a jack and the cutting means incorporates a cutter as recited in Group I is completely different from the system of transfer printing where the transfer means includes a first and second detector and a tensioning system as recited in Group II.

Applicant is advised that the response to this lack of unity of invention requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143) See MPEP 1893.03(d).

Art Unit: 2854

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
